### Sealing discs for sealable ER clamping nuts

The sealing discs are available in steps of 0,5 mm.  
This means, the discs can cover a range of 0,4 mm from normal size shank down to smaller diameters. For example, to clamp a drill of dia. 5,7 a disc of the size 6 mm will be used.

Please note! For high pressure of 100 bar, the size of the shank has to be the same as the nominal size of the disc.

For ordering please complete the item number with the diameter of the disc,

- i.e.: sealing disc for ER 25 with diameter 5,5 = 107-41055
- i.e.: sealing disc for ER 32 with diameter 12 = 107-5112
